On October 18, 2015, one year from today, your new Humber River Hospital will begin making patient care history in Canada. It will be North America's first fully digital hospital, it will teach young doctors a new way to deliver healthcare and it will be a model of efficiency for every hospital in the GTA.

But right now, we need to reach our goal of \$225 million in order to finish and equip what will become the new standard for patient care in Canada.

We're already over one third of the way there and to help us reach the finish line, we needed to bring together an exceptional team of dynamic, insightful and highly talented volunteers.

That's exactly what we've done.

Artist Rendering of the new Humber River Hospital.
Opening October 18, 2015

Revolutionizing how healthcare is delivered.
